Dear fellows,

It is our pleasure to invite you to participate in *ROPEC 2019* by submitting original research papers on any topic related to this special session. The session is focused in promoting the interaction between research areas: *Embedded Systems and System Identification*, to understand and motivate the engineering applications in those fields. Thus, the development of new research works will provide environmental and technological benefits in process industry; through the resolution of common problems by using novel methodologies.

The topics of interest in this session include, but are not limited to:

- *Embedded system applications*
- *Embedded system improvements*
- *System identification*
- *Parameter identification*
- *Modeling and Identification of Mechanical, Biological or Thermal Systems*
- *Numerical simulation and tools*
- *Mathematical models*
- *Modeling and coupling of multiphysical problems*
- *IoT systems*
- *Modeling of dynamic systems*

Important dates:

- July 26: Full paper submission.
- September 2: Acceptance notification.
- September 22: Final paper submission.
- November 13-15: ROPEC 2019.

The accepted and presented paper in the special session will be published in the proceeding of *ROPEC* and they will be indexed by **IEEEExplore** and **Scopus**.

Further information regarding manuscript submission dates, conference fees and accommodation can be consulted at:

<http://ropec.org>

Best regards,

Organizer team
